It's Time for a New Level of **e-Business Confidence**

Remember when doing business meant sitting down at the same table? When you could attach a name to a face, and a handshake was part of the deal? The anonymous world of the Internet has changed all that, offering unparalleled new opportunities for those who do business online - as well as the downside potential for interception, alteration, theft and other serious security issues.

The proven way to win in the online world?

GeoTrust, the leading provider of next generation Internet trust services.

That's why you need GeoTrust, the world's leading provider of next generation Internet trust services. Delivering secure e-commerce transactions, identity verification and authentication services to the global web community, GeoTrust offers a new level of e-business security and confidence — an important step toward leveraging the full business potential of the Internet.

The world's second largest certificate authority, GeoTrust serves more than 50,000 companies in 80 countries - offering reliable, scalable and affordable Internet trust services built on innovative next generation technology.

Internet opportunity is out there.

Make the most of it with proven GeoTrust products and services.

The Internet is All About Opportunity. Seize it With GeoTrust

By 2007, Internet cash transactions will exceed \$30 billion. The online customer universe will number 50 million or more. Vendors, channel partners and employees will actively trade, collaborate and communicate via the web.

What does that mean for you? A new level of productivity and return on investment for your e-enterprise, and a solid foundation for exponential growth and profitability.

Key Business Benefits

- Unlimited B2B and B2C expansion
- Enhanced consumer confidence
- Low total cost of ownership
- Cost-effective online delivery
- Faster time to revenue

Count on Next Generation Trust Services from GeoTrust

Who can you trust when it comes to protecting your e-business? GeoTrust, the world's leading provider of innovative and affordable Internet trust services.

GeoTrust security services offer the lowest total cost of ownership in the industry — and the kind of competitive advantage you can't afford to be without.

Web Trust Services

We can help you reap the rewards of doing business online — without the risk. Our low-cost security services can be up and running right away — offering important protection for customer transactions and communications at an affordable price.

Enterprise Trust Services

Get the enterprise-wide protection you need with reliable and cost-effective GeoTrust security services. Our next generation technology safeguards remote access, online communication and digital transactions for employees, vendors, trading partners and consumers.

Neal Creighton

President and
Chief Executive
Officer

“At GeoTrust, we recognize that the real value of Internet security has more to do with letting the good guys in than keeping the bad guys out. Our goal is to enable your e-enterprise in every way possible.”

A Better Way to Realize Your Full **e-Business Potential**

How do you leverage the power of the Internet?

With GeoTrust, winner of the 2001 Editor's Choice Award from Web Hosting Magazine.

ACCESS SECURED

Web Trust Services that are Fast, Reliable and Cost-Effective

In the online world, business moves at lightning speed, and you can count on GeoTrust to stay a step ahead of it all — with Web Trust Services that are fast to deploy, easy to use and priced at less than competitive solutions. Day-in, day-out reliability is part of the package, too — which translates into total protection for you and everyone you do business with online.

QuickSSL™ Automated 128-bit SSL digital certification for secure e-transactions and communication at a lower cost than competitive products— delivered in just ten minutes.

TrueSite™ Patented “Smart Seal” technology for fast, reliable and user-friendly third-party web site identity authentication that gives your customers the confidence to stay — and pay.

True BusinessID™ [formerly eBusinessID] A bundled package of SSL and True Site services compatible with all popular web browsers for end-to-end online security that’s easy to implement and manage — all at an affordable price.

Enterprise Trust Services Designed for Communication and Collaboration

True Credentials™ Fully managed enterprise identity and trust services that safeguard communication and data exchange between you, your employees, vendors, partners and customers:

- **Secure Access** Safely extends Intranet and extranet environments via all standard web servers, browsers and leading VPN hardware.
- **Secure Messaging** Ensures private and secure e-mail communications fully compatible with leading e-mail applications.
- **Paperless Transactions** Reduces the high cost and abandonment rate of paper-based applications and other documents through secure online signatures.

Consulting Services that Meet Your Individual Security Needs

Tailored to your specific requirements, GeoTrust Consulting Services ensure the success of your network security initiatives. We offer a choice of customized or pre-configured strategic planning and deployment options for every aspect of your e-business — all built on state-of-the-art GeoTrust security technology.

Salvatore Milia

CTO
Backbone
Technology, Inc

“GeoTrust issues certificates within minutes using their automated web-based process, eliminating the need for manual provisioning. We are very pleased with our customers' enthusiastic response and our reduced operating expense.”

Minimize Online Risk. **Maximize Business Potential**

Why choose GeoTrust for your Internet trust services? Speed, ease and affordability that's ours alone.

**Jess Coburn,
MCSE**

President
Applied Innovations

"I can't say enough good things about the support we've received from geotrust.com. I know I have made the right choice for web server certificates, and I can 'sleep easy' knowing that my requests will be handled promptly and efficiently by a knowledgeable and friendly team."

Don't Wait to Win in the Online World, Protect your e-Business Future Today

In the Internet world — where risk and reward are never far apart — your e-business success depends on the kind of security and confidence GeoTrust Web and Enterprise Trust Services can provide.

Only GeoTrust offers:

- Fully managed Internet trust services
