

## QuickSSL™ Web Server Certificates

### Customer Success Story #63

**"GeoTrust had us up and running very quickly. I especially appreciate the verification through domain e-mail or secondary domain...thanks for a good experience."**

**Jess Coburn, MCSE  
President  
Applied Innovations**

### Ultimate online protection at a remarkably low price in just 10 minutes.

With GeoTrust QuickSSL™ Web Server Certificates, you and your customers can conduct secure Internet transactions with the complete confidence you deserve. QuickSSL offers true 128-bit encryption that's fully compatible with leading web browsers including Microsoft, Internet Explorer 5.01 and higher, and Netscape/AOL browsers 4.51 and higher — all at a fraction of what you'd pay for other SSL solutions. And unlike competitive products, you don't have to wait days for SSL security; GeoTrust QuickSSL offers airtight Internet protection in about ten minutes.

By activating the browser's "LOCK" icon, QuickSSL assures your online visitors that credit card account numbers and other confidential information cannot be viewed, intercepted or altered. And because our automated authentication system is the most advanced in the industry, your customers and trading partners can be sure that QuickSSL Web Server Certificates are only issued to fully authorized recipients.

Best of all, our leadership pricing structure means you don't have to pay a lot for the reliable Internet protection you need. Because GeoTrust systems can automatically verify that a certificate holder has appropriate administrative right to a web server's domain, our costs for issuing QuickSSL certificates are significantly lower than competing SSL products — and we pass those savings on to you.

### Only GeoTrust QuickSSL offers these important features:

- A full year of online security for a remarkably low price
- True 128-bit encryption for total data protection
- Fast and easy installation in about ten minutes
- Additional savings with multi-year certificate discounts

### GeoTrust, the leading provider of 2nd generation Internet trust services.

Providing secure e-commerce transactions, identity verification and authentication solutions to the global web community, GeoTrust delivers a new level of e-business security — your first step toward leveraging the full business potential of the Internet.
